CONTENTS OF VOLUME 22

Number 1, January 1968

Elizabth Roboz Einstein, Karen Richard, and Prisca Cerutti. Quantitative Determination of γ-Globulin in the Human Sera by Column Chromatography 1

D. F. Cain and R. E. Pitney. A Method for the Determination of the Relative Specific Radioactivity of [^{3}H] Protein in Acrylamide Gel 11

Billy W. Perry and Robert J. Hill. Quantitation of Hemoglobins A and S Separated by Starch Gel Electrophoresis . 21

Martin G. Stanton. Colorimetric Determination of Inorganic Phosphate in the Presence of Biological Material and Adenosine Triphosphate 27

D. D. Christianson, J. W. Paulis, and J. S. Wall. Ion-Exchange Chromatography of Nucleotides on Polyethyleneimine Cellulose Columns: Analysis of Maize Grain Extracts . 35

Elizabeth S. Mingioli. New Correction Factors for Spectrophotometric Assay of Erythrocyte Porphyrins 47

J. Julian Chisolm, Jr. Determination of δ-Aminolevulinic Acid in Plasma 54

Charles H. Chervenka and Karen Cherry. New Technique for Continuous-Flow Centrifugation with Banding . . . 65

Torben Clausen. Measurement of ^{32}P Activity in a Liquid Scintillation Counter without the Use of Scintillator . . 70

P. G. Roughan and R. D. Batt. Quantitative Analysis of Sulfolipid (Sulfoquinovosyl Diglyceride) and Galactolipids (Monogalactosyl and Digalactosyl Diglycerides) in Plant Tissues . 74

Peter V. Tishler and Charles J. Epstein. A Convenient Method of Preparing Polyacrylamide Gels for Liquid Scintillation Spectrometry 89

Arne Dahlqvist. Assay of Intestinal Disaccharidases . . . 99

Norman A. Cummings, Edward L. Kuff, and Herbert A. Sober. Examination of Magnesium Binding to Serum Proteins by Ultracentrifugal Analysis 108

T. Wood and Dawne E. Abrahams. A Reagent for the Detection of Ketopentoses and Ketopentose Phosphates on Chromatograms 117

Earl F. Walborg, Jr., and Roberta S. Lantz. Separation and Quantitation of Saccharides by Ion-Exchange Chromatography Utilizing Boric Acid/Glycerol Buffers 123

P. J. Smith and T. S. Hermann. Separation and Identification of Benzothiadiazines in Commercial Formulations by Thin-Layer Chromatography and Infrared Spectroscopy . . . 134
Mats Hamberg, Walter G. Niehaus, Jr., and Bengt Samuelsson. Preparation, Isolation, and Characterization of a Derivative of Malonaldehyde 145
R. A. Speckman and E. B. Collins. Separation of Diacetyl, Acetoin, and 2,3-Butylene Glycol by Salting-out Chromatography 154
W. F. Blatt, B. G. Hudson, S. M. Robinson, and E. M. Zipilivan. A Modified Ultrafiltration Cell for Separating the Products of Proteolysis 161

Short Communications

Peter B. Rowe. A Simple Method for the Synthesis of N^5,N^{10}-Methenyl-tetrahydrofolic Acid 166
Y. Rotman and M. L. Fields. A Modified Reagent for Dipicolinic Acid Analysis 168
Patricia Hastings and J. T. Wong. A Simple Procedure for Eluting Nucleotides from Thin-layer Plates . . . 169
G. D. Birnie and D. R. Harvey. A Simple Density-Gradient Engine for Loading Large-Capacity Zonal Ultracentrifuge Rotors 171
B. A. Cooke and J. Chakraborty. An Absorption System for Collecting Dog Respiratory CO_2 174
J. De Bersaques. Determination of Leucine Aminopeptidase Activity with Radioactive Leucinamide 176

Number 2, February 1968

Richard Charles and Adelbert M. Knevel. An Alternating Current Polarographic Determination of Nonprotein Sulfhydryl in Biological Systems 179
Nicholas M. Alexander and Robert Scheig. Gas Chromatography of the Trimethylsilyl Derivatives of Iodotyrosines and Iodothyronines 187
William E. Groves, Francis C. Davis, Jr., and Bruce H. Sells. Spectrophotometric Determination of Microgram Quantities of Protein without Nucleic Acid Interference 195
G. Wettermark, E. Borglund, and S. E. Brolin. A Regenerating System for Studies of Phosphoryl Transfer from ATP . . 211
G. F. Domagk and H. H. Schlicke. A Colorimetric Method Using Uricase and Peroxidase for the Determination of Uric Acid 219

68-44650

PIERGIORGIO RIGHETTI, LUIGI DE LUCA, AND GEORGE WOLF. A Radiometric Assay for Arginase 225

The Gilford 240 Spectrophotometer gives you numbers that count

...stability

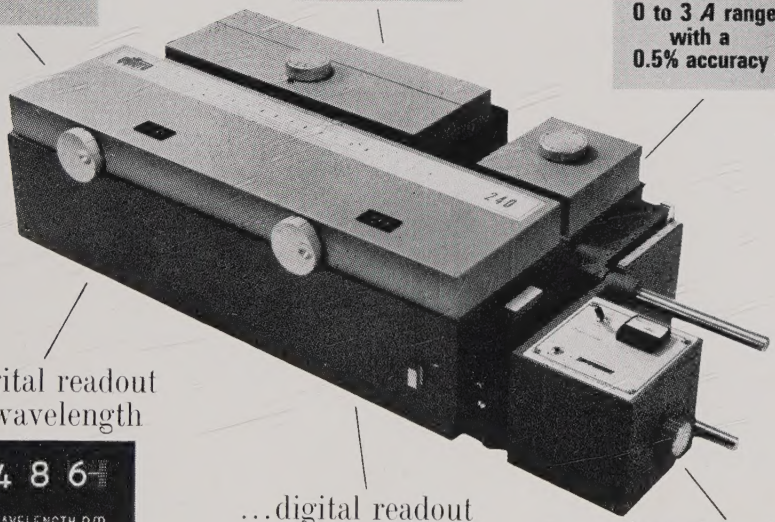
0.005 *A* per hour drift

...repeatability

0.002 *A*

...three decade absorbance range

0 to 3 *A* range with a 0.5% accuracy



...digital readout of wavelength

4 8 6

WAVELENGTH nm

...digital readout of slit width

1 4 3

SLIT WIDTH mm

...digital readout of true linear absorbance

2.4 5 1

...plus versatility The Gilford Model 240 illustrated is a complete manual spectrophotometer. Its stability, sensitivity and range coupled with a variety of accessories make it the ideal spectrophotometer for many applications. You may add at any time labor saving accessories ... such as a programmed automatic sample handling system, continuous flow cells, automatic absorbance recording and equipment for gel scanning.

YOUR FIRST STEP — find out how the new Gilford Model 240 can meet your present spectrophotometric needs without excessive expenditure, yet give you the foundation and the flexibility to meet the expanding and changing needs of the future. Write for your copy of booklet B42, or better still, phone Area 216/774-1041.

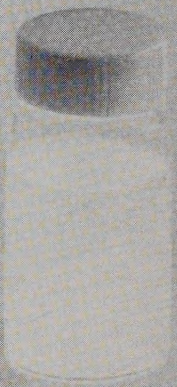
INSTRUMENT LABORATORIES, INC.
OBERLIN, OHIO 44074

With its on-line compute Intertechnique's SL 40 liquid scintillation spectrometer gives immediate results

♦ With a 1024 word core memory



It counts, then computes and prints true disintegrations per minute of ^{3}H, ^{14}C, and other ß-emitters in quenched and unquenched samples

- Computes DPM for up to 200 single - or dual - isotope quenched or unquenched samples.
- Quenched samples may be treated by external standard ratio or channel ratio methods using calibration curves stored in the core memory.
- Computes isotope ratio for dual isotope samples.
- Alternate operating mode permits variably quenched 14 C and other more energetic isotopes to be counted at constant efficiency.

Designed with the operator in mind, the pre-programmed computer makes the SL 40 extremely easy to operate. Sophisticated design techniques simplify control yet allow maximum flexibility.

Complete documentation is available : we would be pleased to send it to you.

From the world's largest producer of multi-channel analyzers.

The Hallucinogens

By **A. Hoffer**
Formerly, Director, Psychiatric Research
Psychiatric Services Branch
Department of Public Health, Saskatoon, Saskatchewan, Canada

H. Osmond
Director, Bureau of Research in Neurology and Psychiatry
New Jersey Neuro-Psychiatric Institute, Princeton, New Jersey

"The use of hallucinogens has been described as one of the major advances of this century. There is little doubt that they have had a massive impact upon psychiatry and may produce marked changes in our society. The violent reaction for and against the hallucinogens suggests that, even if these compounds are not universally understood and approved of, they will neither be forgotten nor neglected." —FROM THE AUTHORS' PREFACE

TOOLS FOR DISCOVERY

The seven newly-published brochures shown above demonstrate the broadening scope of the Miles program to provide advanced products for scientific exploration. These publications are more than price lists. They include detailed preparative, application, and bibliographic information, in addition to comprehensive product specifications. To complete your library, request any or all of these publications.

Physiological Pharmacology

A Comprehensive Treatise

Edited by **Walter S. Root**
Frederick G. Hofmann
Both at College of Physicians and Surgeons Columbia University, New York

Editorial Advisory Board

K. H. Beyer, Jr. — *U. S. von Euler*
D. Bovet — *C. A. M. Hogben*
H. B. van Dyke — *W. M. L. Perry*
J. A. Schneider

Provides a definitive account of the experimental evidence upon which pharmacodynamics is based. Each contribution is authoritative, systematic, and embodies current concepts of the effects of drugs on physiological systems as well as present knowledge of their mechanisms of action. The chapters include not only factual evidence, but also theoretical interpretations receiving serious consideration at the present time. Experimental findings that have led to presently held concepts are critically evaluated rather than presented in mere summary form.

TOBACCO AND TOBACCO SMOKE

tudies in Experimental Carcinogenesis

dited by **E. L. Wynder** and **D. Hoffmann**

Both at the Sloan Kettering Institute for Cancer Research, New York City

is volume presents a thorough discussion of the biological and chemical pects of tobacco and tobacco smoke carcinogenesis and of related fields. provides complete references to the literature, including the major recent udies. Some of the laboratory methods practiced in tobacco carcinogenesis well as their chemical-analytical foundation are described.

selective summary of experiments on the biological testing of tobacco ex-acts, tobacco smoke condensate, tobacco smoke, and fractions of these ma-rials is given in a concise tabular form. Similarly, groups of tobacco constitu-ts and individual smoke components are presented in tabular form with an aluation of their respective roles in experimental carcinogenesis.

major subject of this work is the possibility of reducing carcinogenic and/or -carcinogenic properties of tobacco products. The measures dictated by rlier biological and chemical work lead into such fields as tobacco production d processing, reconstituted tobacco sheet, filtration of cigarette smoke, and e selective filtration of tobacco smoke.

IN THREE VOLUMES—

Venomous Animals and Their Venoms

Edited by **Wolfgang Bücherl**
Instituto Butantan, São Paulo, Brazil
Eleanor E. Buckley
Wyeth Laboratories, Philadelphia, Pennsylvania
Venancio Deulofeu
Faculty of Exact and Natural Sciences
University of Buenos Aires

Volume I
Venomous Vertebrates

This three-volume treatise presents taxonomic, morphologic, and ecologic data on all classes of venomous animals. The contributors discuss the structure and function of the venom-producing and delivering apparatus, as well as the chemical, biochemical, pharmacologic, and toxicologic properties of the venoms. Also considered are the medical aspects of the exposure to venoms, the description of clinical symptoms, including the production and use of antisera.

1967, about 650 pp., $34.00
subscription price, $28.50*
